LEONLEGION DESIGN

ABOUT US

We are a company specialized in different aspects of design, based in District 9, Ho Chi Minh City, Vietnam. Based on our previous experience, projects, and contacts we expanded our orientation into several fields of engineering, 3D printing, internet of things (IoT), education, Website Design, and Mobile App. Whether your next project is an engineering design issue, IoT, or a simple education, this is the right place for you!

We confidently declare that we will satisfy even the most discerning customers.

Our vision is:

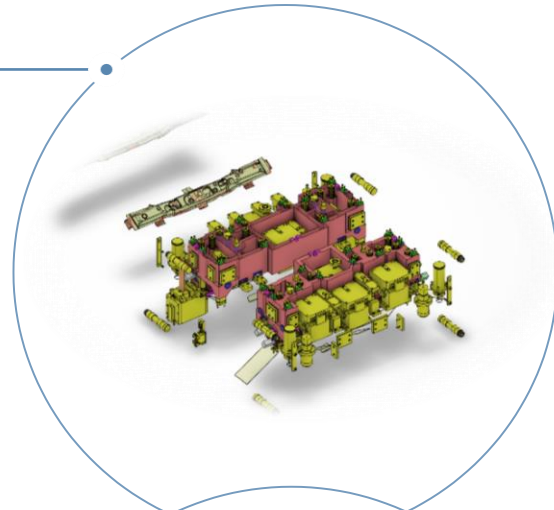

“To create core value for the customer.”

WHAT DO WE DO?

We offer our clients a diverse product portfolio, like Mechanical Engineer (BIW, "Body-in-White", Automotive, Automation, Mechatronics, Industrial Machinery, Engineering R&D, Product design), Internet of Things (IoT), Website Design, Mobile App Design, as well as dies and presses and other related services.

MECHANICAL ENGINEERING

If You look for someone who will turn your idea into a real-life product, you are in the right place. We provide services in the field of mechanical engineering: product development, product design, redesign of the existing product, production of technical documentation, optimization, 3D printing, prototyping, etc...

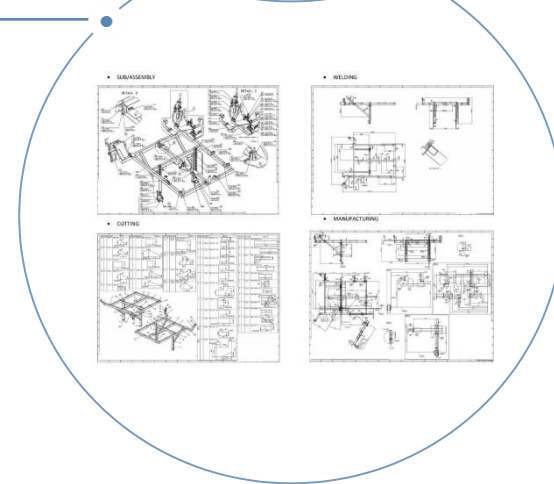

INTERNET of THINGS (IoT)

You want your product to be "smart", IoT offers a solution for it. IoT is a network of physical objects - various products, gadgets, vehicles, which incorporate sensors, electronics, software, and a network connection that allow the facilities to exchange data with the manufacturer, operator and/or other connected devices ...

EDUCATION

With a team of engineers with many years of experience, our team is ready to teach you things we like to do. 3D design in Solidworks and CATIA V5, Siemens NX, 2D drawing in AutoCAD, 3D printing and much more ...

WEBSITE DESIGN

LEONLEGION works with you to develop visually stunning design solutions that communicate your branding, look, feel, and message across any platform.

MOBILE APP DESIGN

Our goal is to bring convenience to our customers, so we built it on your mobile device

OUR TECHNOLOGIES

The LEONLEGION® Team specializes in engineering services with various technical aspects ranging from CAD to CAM Program and Data Verification, CAE Analysis and Simulation, Special Training Program, and Consultancy.

OUR PRINCIPLES

We want to be a strategic supplier trusted by our clients, excellent in our operations, to offer innovative products while maintaining sustainable economic and social development and encouraging the personal and professional development of our people.

The client as the centre of the business

The basis of our business lies in achieving and maintaining a client portfolio by developing and providing products that offer high value in terms of innovation, price, quality, safety, and environmental impact. We must be able to take the lead in providing the best solutions so that the business of each of our clients prospers, which requires having a thorough understanding of their needs in the short, medium and long term. Building solid, honest, and lasting relationships with our clients is what really sets us apart.

Operating excellence as a regular practice

Competitiveness has to do with quality, efficiency, and effectiveness. It is acquired through a long learning process. It is kept up with consistency, fulfillment, a sense of urgency, and using the correct procedures to execute every task as best as possible. It is improved by means of a constant effort by everyone to improve what is already good. In such a competitive sector as the designer industry, we have to stand out in what we do. Our operations must be excellent.

Sustainability to ensure permanence in time

We plan to grow and to be around for a long time. Financial strength, profitability, cautious risk management, and respect for the different environments in which we operate are the best guarantees of our future. Winning the confidence of our shareholders and business partners, complying with the laws of the countries where we operate, expressing our support for fundamental Human Rights and making health, safety, and environment important issues.

People as architects of success

Talent, motivation and the ability to work as part of a team of people are essential assets for Gestamp's success. Promoting the personal and professional development of employees brings about the fulfilment of other business objectives.

Innovation as a means of progress

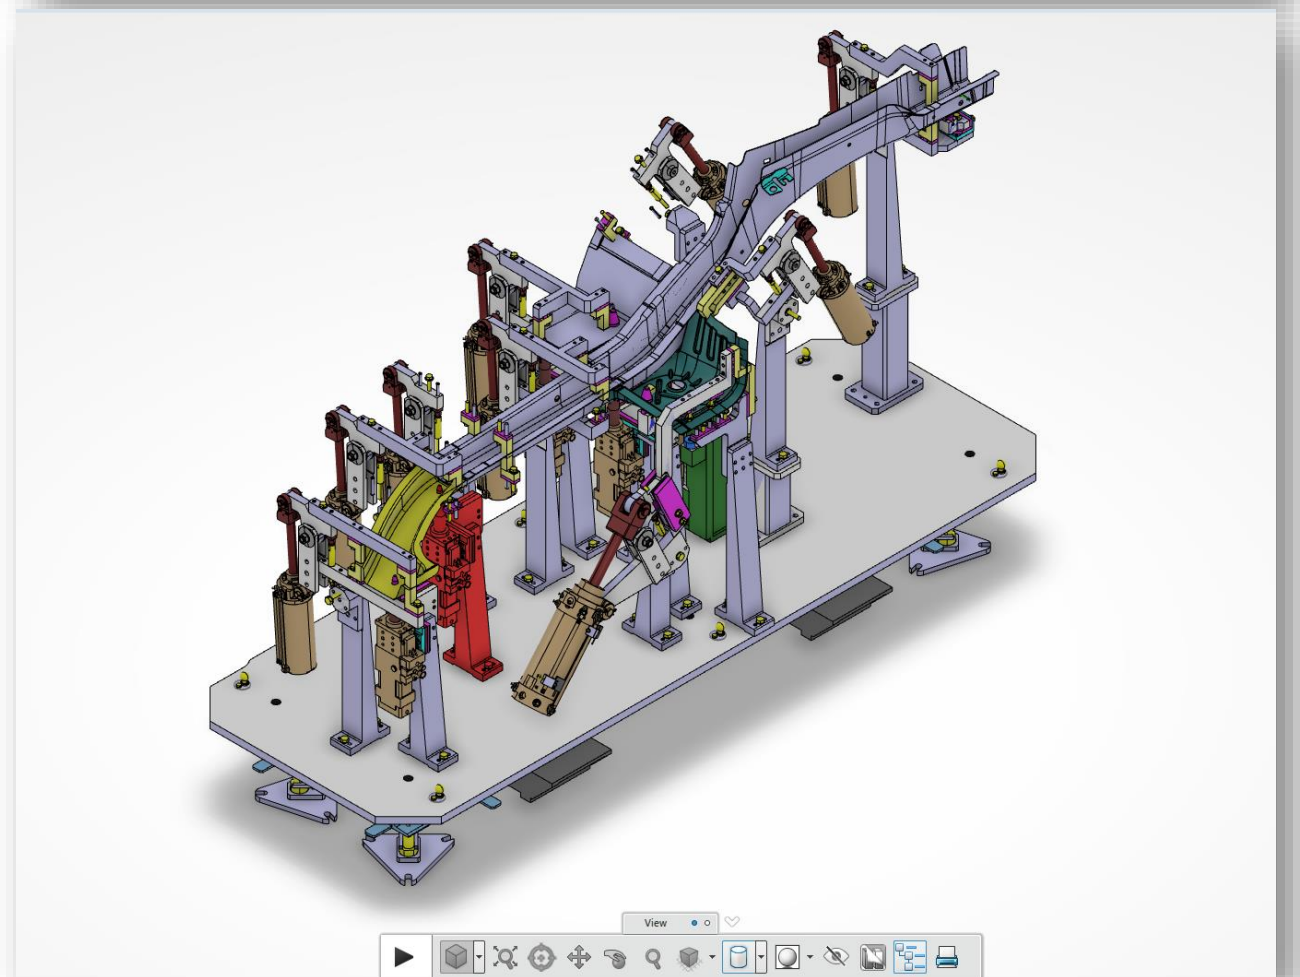

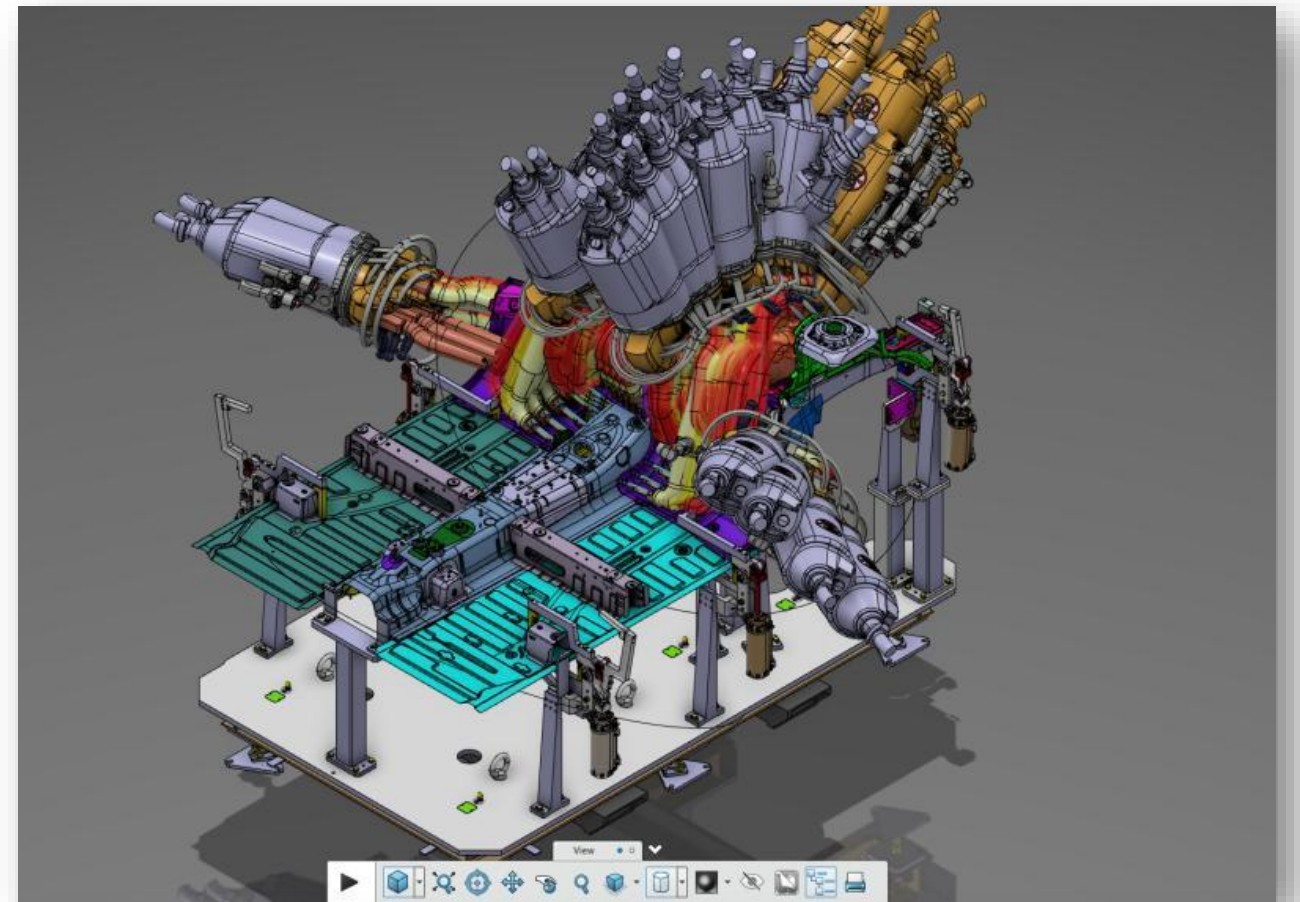

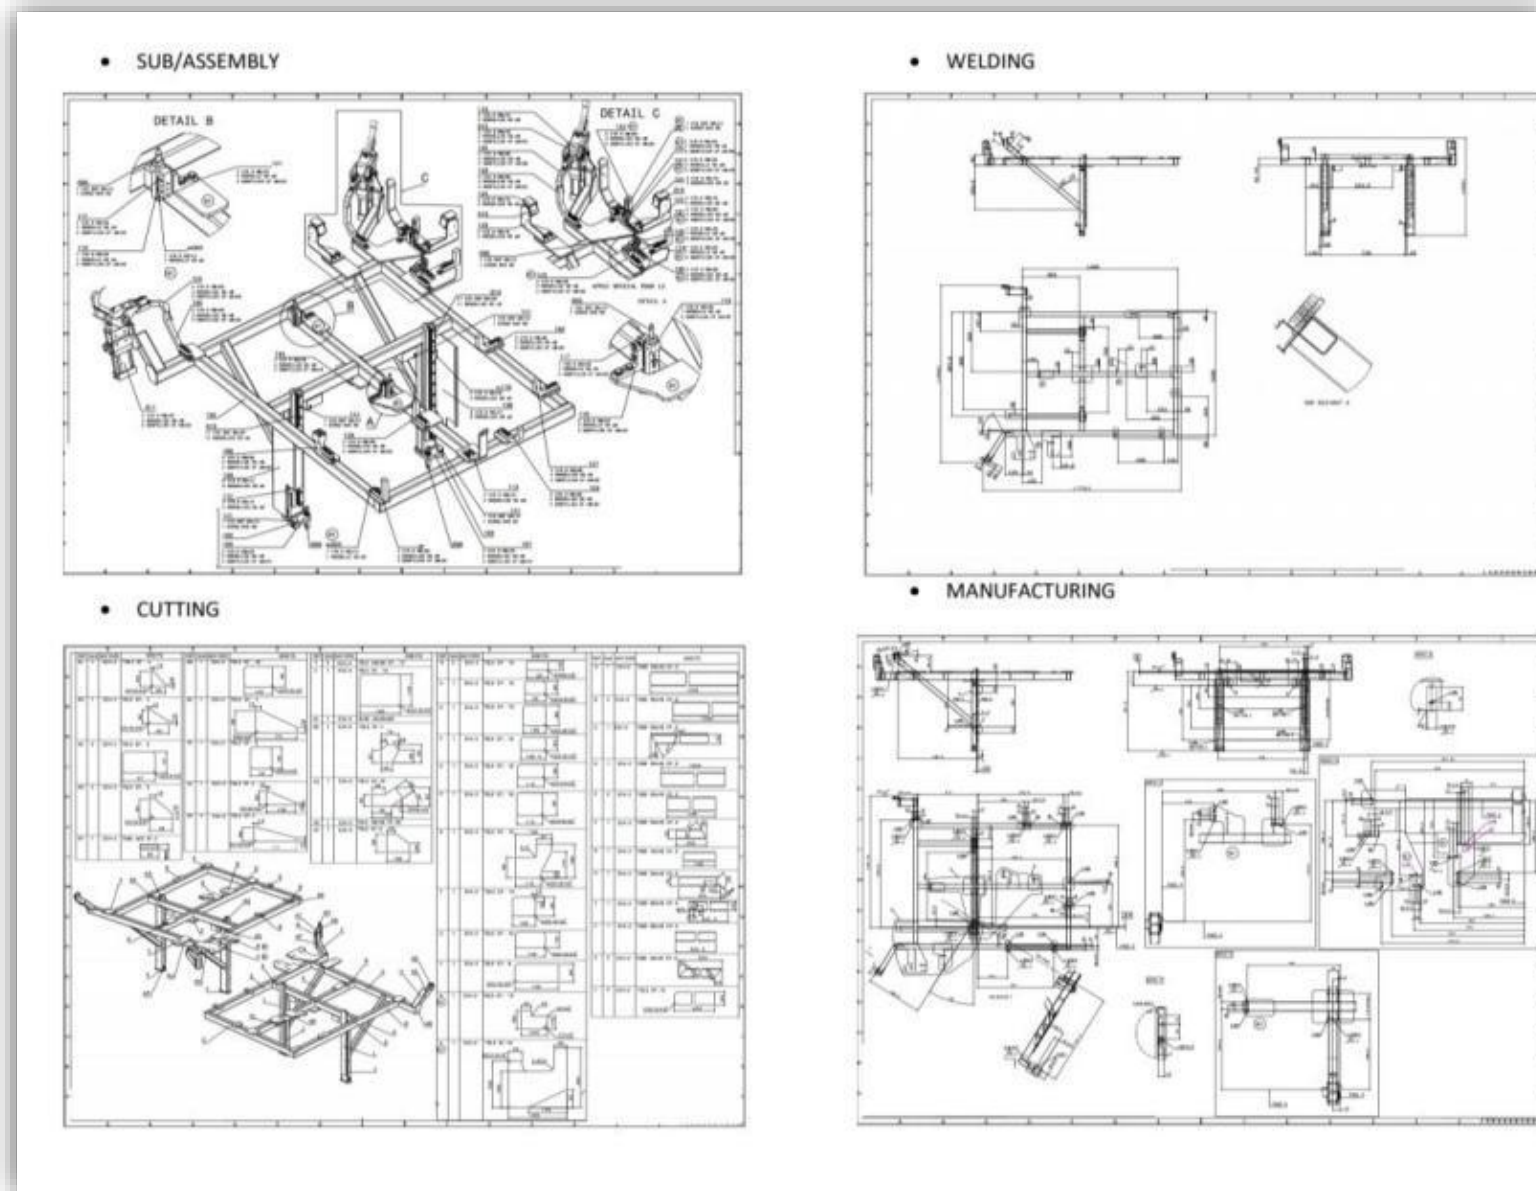

Innovation enables us to consolidate the Company's leadership and to provide new alternatives for products and processes that bring value to clients and efficiency to our internal management. Our challenge is to position ourselves at the forefront of innovation in our industry. We must be innovative and make our clients aware of the differential value provided by LeonLegion.

PROJECTS

Build it Better

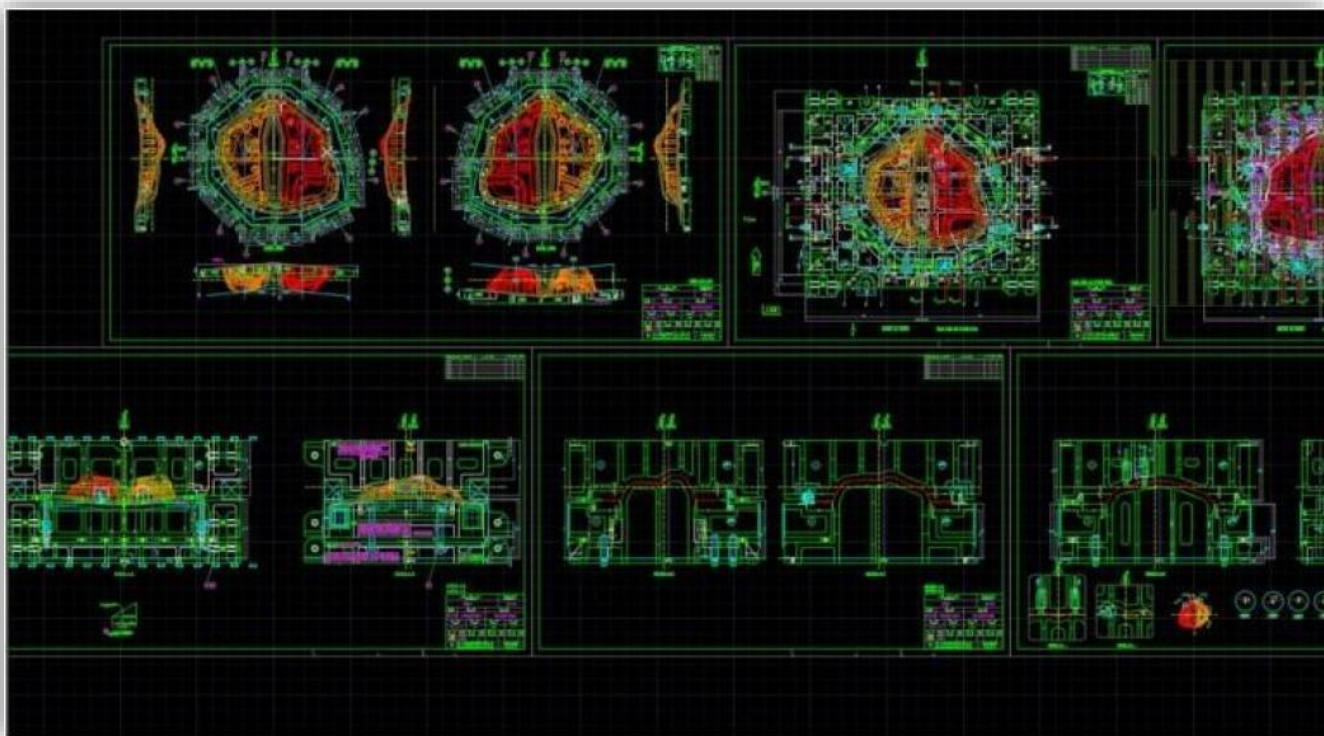

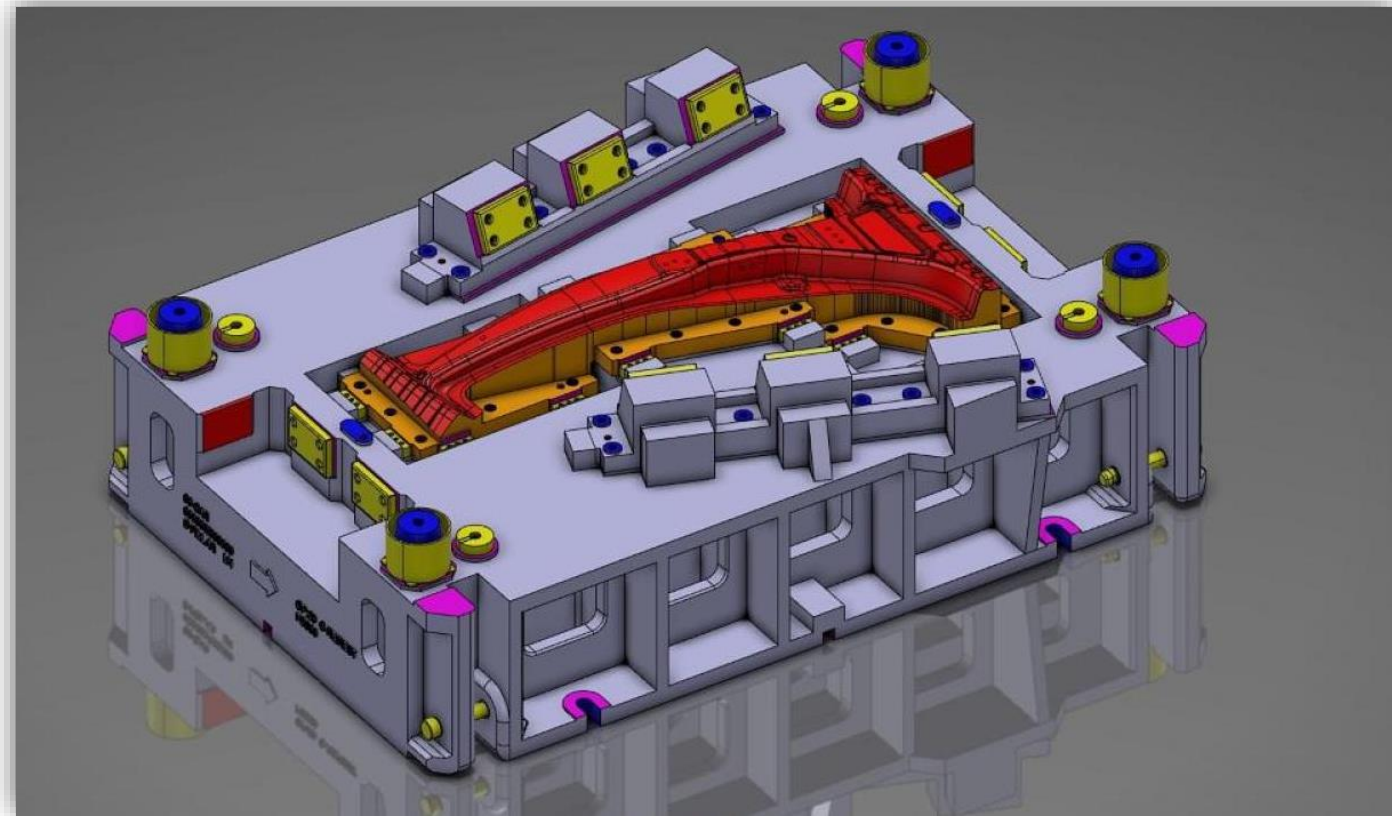

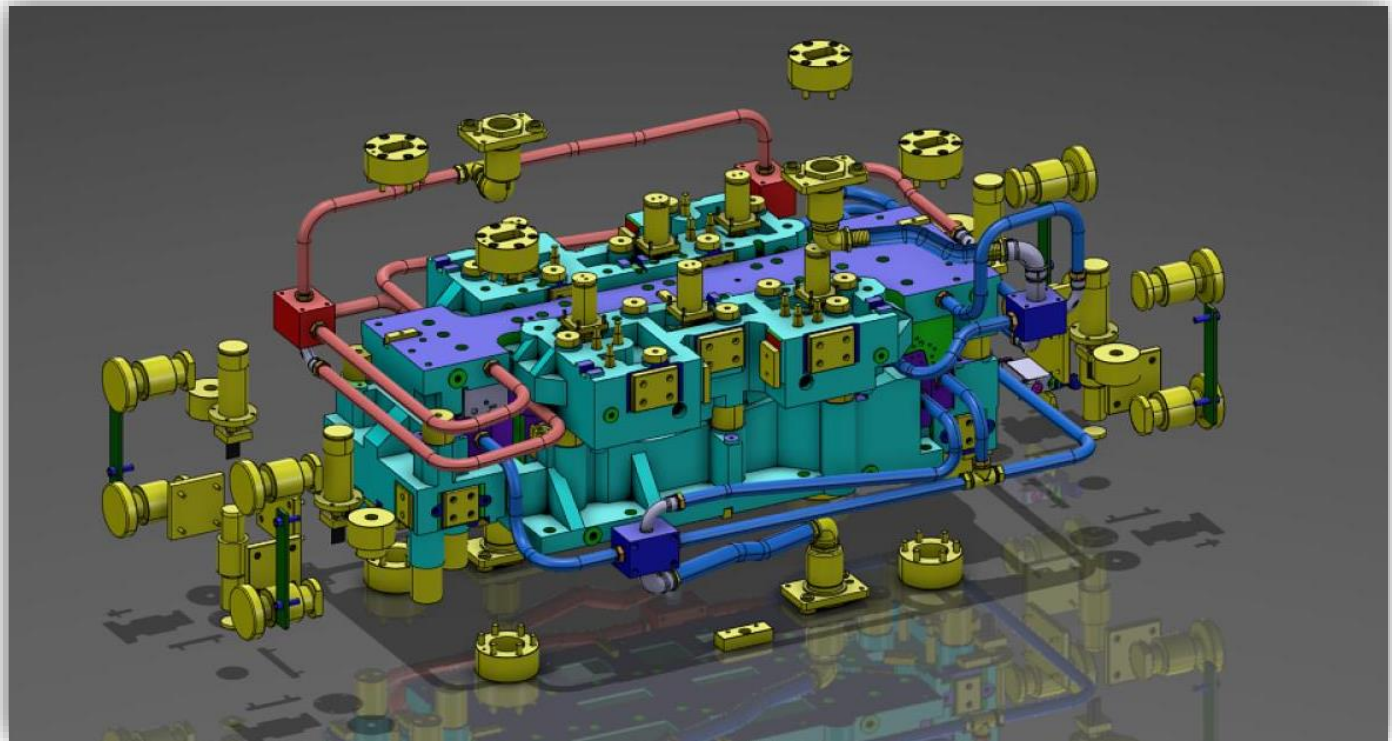

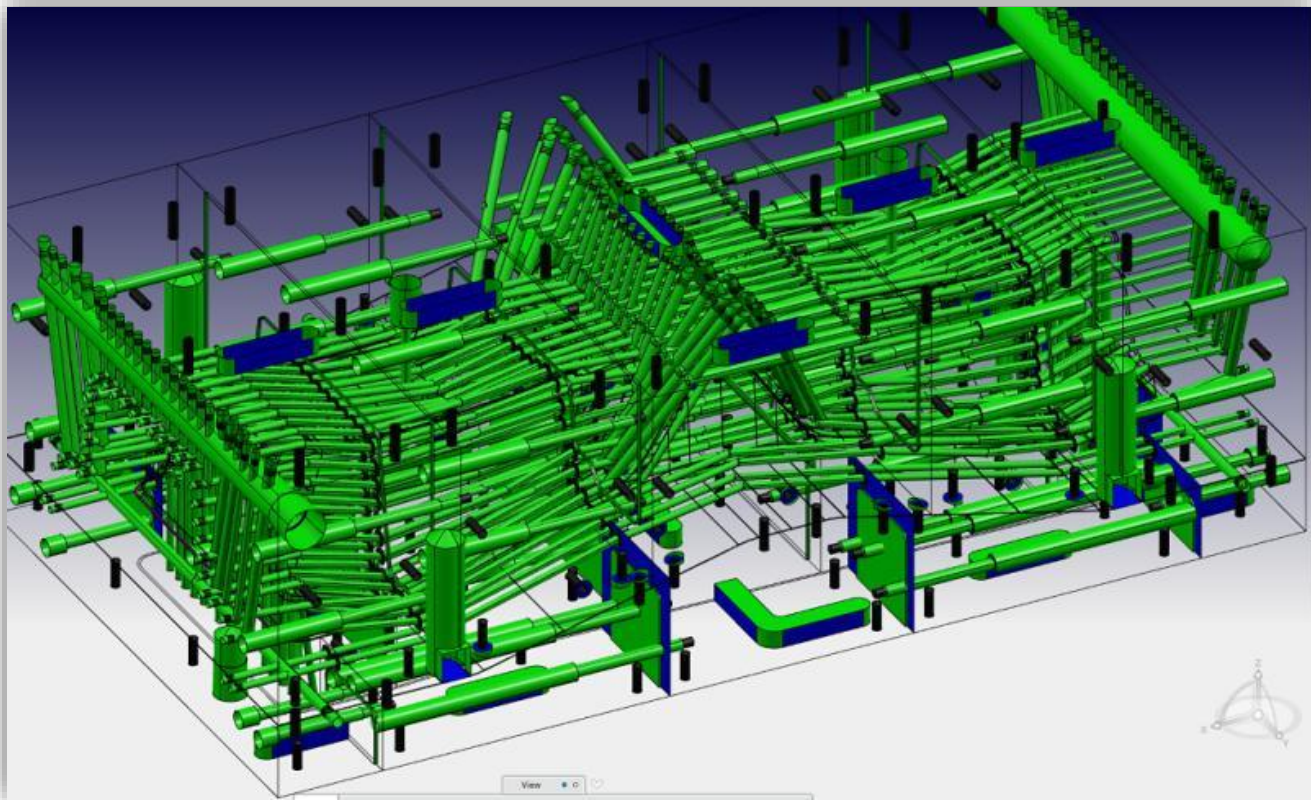

Body in White (BiW)

- Body-in-White for THACO - Peugeot 3008 & 5008 (Design 3D models of welding jig, fixture and other equipment in the factory (gripper, deposit table, palette, rotate table, fence, ...).

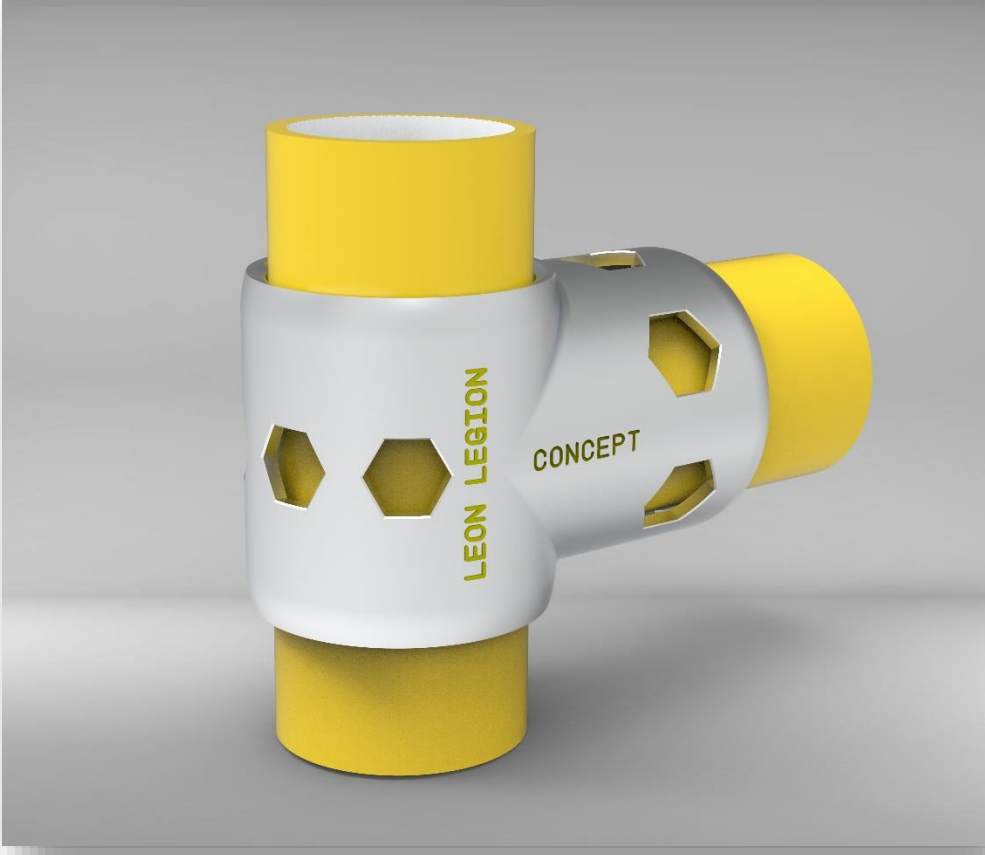

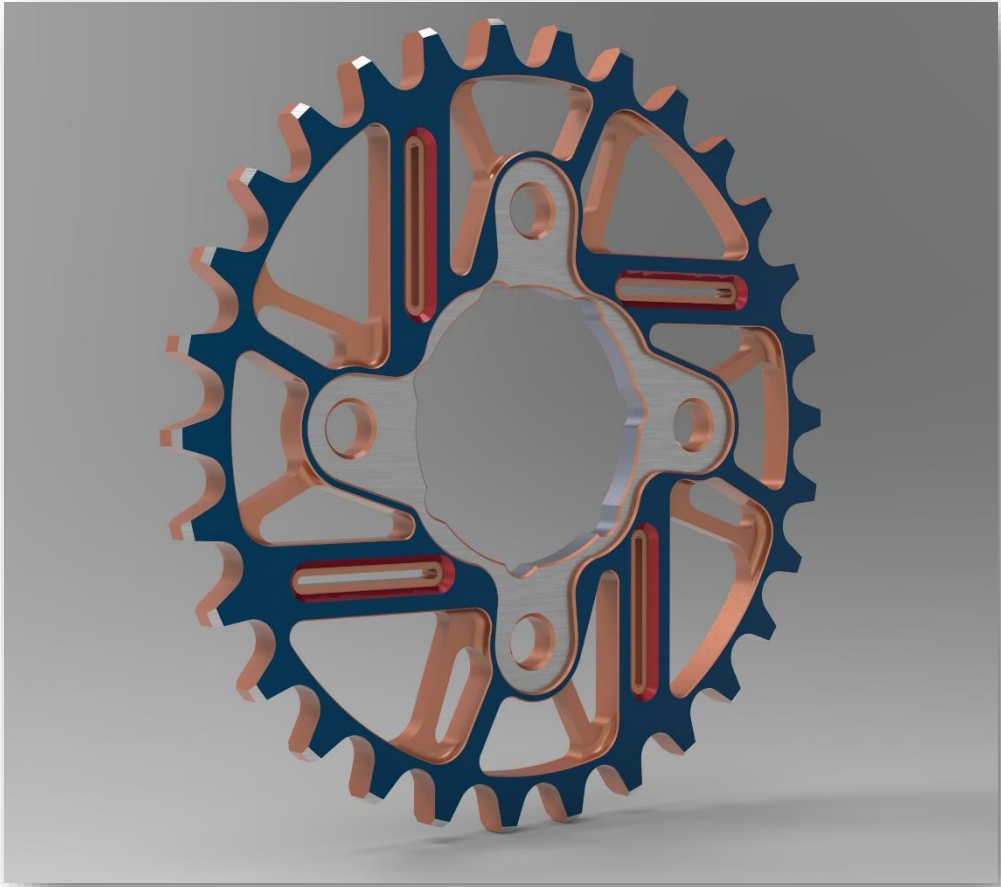

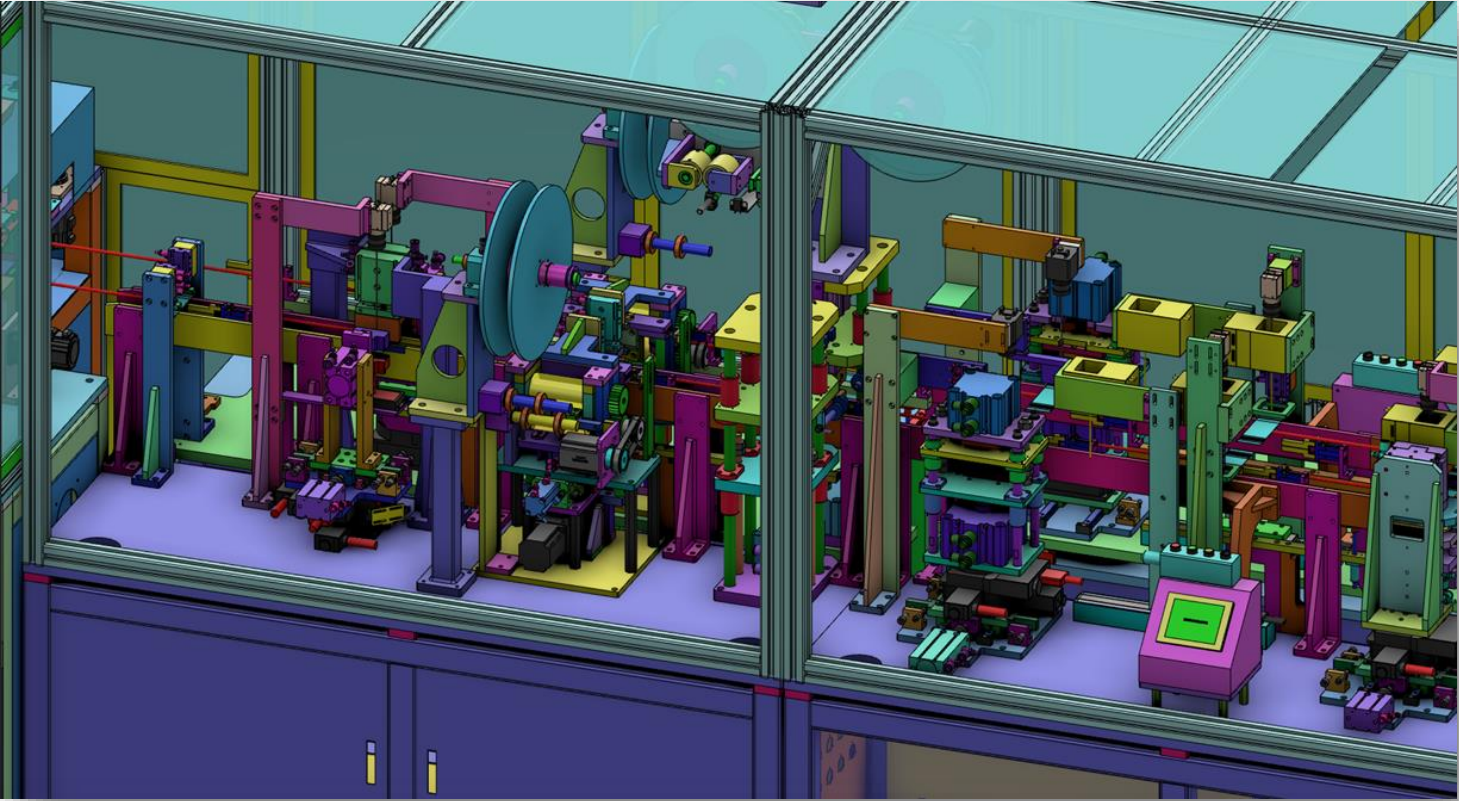

Stamping Dies

One of our core competencies is the construction of challenging dies.
